-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they include the following reference sign(s) not mentioned in the description: "106c" and "106d" in Figure 3. A proposed drawing correction, corrected drawings, or amendment to the specification to add the reference sign(s) in the description, are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 8 is rejected under 35 U.S.C. 102(b) as being anticipated by Fromm (US Patent 6,050,695).

Regarding Claim 8, Fromm discloses a friendship object kit comprising of at least a pair of friendship objects that are packaged and sold together (abstract), wherein a first friendship object of the pair is for a first person to keep and a second friendship object of the pair is for a second person to receive from the first person (column 1, line 12); the first and second friendship objects each comprising a connecting mechanism to enable multiple friendship objects from different pairs of friendship objects to be linked together since they are electrically linked by the contacts 28 and 30; and wherein each of the first and second friendship objects is personalized by an audible message (54).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 9 is rejected under 35 U.S.C. 103(a) as being unpatentable over Fromm in view of Ellner et al. (US Patent 6,618,328).

Regarding Claim 9, Fromm discloses all the claimed features as discussed in the rejection above except for each of the first and second friendship objects having a voice recording and playback mechanism. However, Ellner et al. teach the use of a voice chip (125) for recording and a playback mechanism (125 and 127).

Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to have modified the device of Fromm to include a recording and playback mechanism as taught by Ellner et al. in order to generate a desired message of the user.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
